Past *Inhalation* covers, with thanks to our three charter advertisers!

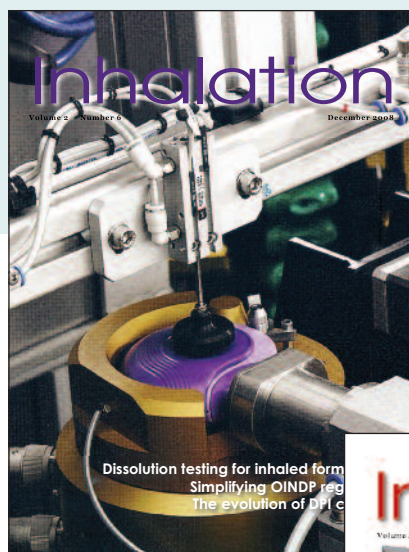

Inhalation's first cover, October 2007, courtesy of GSK, showing manufacturing of metered dose inhalers.

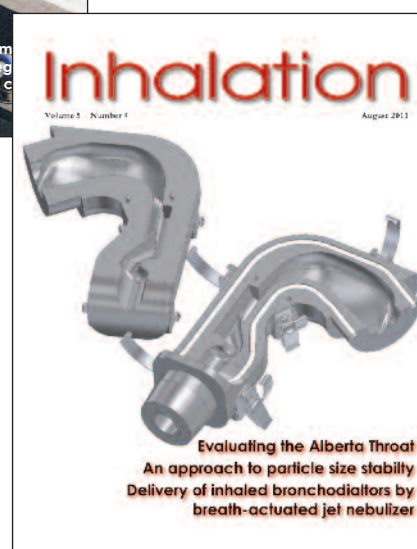

Inhalation's second cover, February 2008, courtesy of MSP Corporation, spotlighting the NGI™.

Inhalation's Back Page column appeared for the first time in April 2014. It covers a wide range of topics, including innovative technical concepts and important clinical issues, and occasionally a lighter look at our industry.

In this issue, we look back at selected covers from *Inhalation's* ten-year history. Covers are usually contributed by our advertisers so, along with our first cover, we have chosen to recognize and thank the three companies who have advertised in **every issue** of *Inhalation!* They are (in alphabetical order): Astech Projects, Ltd., Copley Scientific, Limited and MSP Corporation. Their longtime support is sincerely appreciated.

The December 2008 cover, courtesy of Astech Projects, Ltd., showing their Xelair® system for testing dose content uniformity of the emitted dose.

The August 2011 cover, courtesy of Copley Scientific, Limited, featuring the Alberta Idealized Throat.
