

A preview of the 22nd ISAM Congress

The 22nd Congress of the International Society for Aerosols in Medicine (ISAM) will be held in Montreux, Switzerland, May 26-29, 2019. This pulmonary drug delivery and respiratory health conference will bring together health care professionals, aerosol engineers, formulations scientists and regulatory representatives.

Scientific agenda

Presentation topics will include new devices and emerging therapies; the gap between *in vitro*, *in silico* and clinical data; pulmonary immune-modulation; pulmonary hypertension; predictive therapy models; novel uses for old drugs, and digitalization and inhaled therapy.

Pre-conference workshops

On May 25, three pre-conference workshops will be offered:

- The basics of aerosol technology for respiratory drug delivery
- What are the opportunities in inhaled drug delivery? (presented jointly with IPAC-RS)
- Advanced lung cell culture models and microfluidic tissue chips in aerosol medicine and respiratory disorders

Additional events

The conference will also include posters and an exhibition by companies. Social events for the conference will include opening and farewell receptions. A conference dinner (for an additional fee) will also be featured.

When?

May 26-29, 2019

Where?

Montreux, Switzerland
