

Previewing the 5th International TB-Meeting

The 5th Inhaled Therapies for Tuberculosis and Other Infectious Diseases Conference will take place August 25-27, 2019 in Groningen, The Netherlands. Previous events were held in India (2011), Japan (2013), Italy (2015), and North Carolina, US (2017).

Session topics

Presentations will discuss research and address problems and opportunities related to new developments in inhaled therapies for tuberculosis in particular and other infectious lung diseases in general.

Session topics will include:

- Formulations and devices
- Development and implementation
- Preclinical, models and modeling
- Clinical trials and use

An additional session will feature submitted abstracts.

First-time awards

For the first time, the Anne de Boer award (of €1500) will recognize the work of a promising young investigator (less than 35 years old) in the field of inhaled therapies against infectious diseases. Five candidates will give oral presentations and the winner will be announced during the closing dinner. Five travel grants will also be awarded.

When?

August 25-27, 2019

Where?

Groningen, The Netherlands
