

Previewing the 8th MVIS Symposium and Workshop

The 8th Medicon Valley Inhalation Symposium and Workshop will take place October 7-10, 2019 in Lund, Sweden. Participants may register for either or both events.

The MVIS Symposium

The symposium on October 9 and 10 has the theme, “Future Opportunities of Inhalation” and preliminary topics of Wixela™ Inhub™, IVVC and PK variability, regulatory aspects and PK studies, flow restriction training devices, x-ray computed tomography, nanoparticulate systems, spray drying sensitive compounds, perfused lungs in pre-clinical testing, supercritical solutions in particle engineering, acoustic monitoring, solid state relaxation of an API and pharmacokinetics following inhalation.

The MVIS Workshop

Designed for those who are new to inhalation, the workshop will run from the afternoon of October 7 through October 8. Lectures and demonstrations are expected to introduce devices (DPIs, MDIs, and jet, ultrasonic and mesh nebulizers), design, pre-clinical pharmacology, DPI formulation and manufacturing, liquid formulations, nasal drugs, deposition and dissolution in the lung, delivered dose and impactor measurements, regulatory issues and patient factors.

When?

Workshop: October 7-8, 2019

Symposium: October 9-10

Where?

Lund, Sweden
