

Previewing the IPAC-RS/ RDD® Symposium

Respiratory Drug Delivery (RDD®) and IPAC-RS will jointly present the symposium, “The Global Regulatory Landscape and Advances in Digital Technology: Transforming the OINDP-Patient Experience.” The event will begin the afternoon of April 30 and continue on May 1 at the JW Marriott Desert Springs.

Session 1: Dry Powder Inhalers: Predictive Tools and Modeling Approaches

The latest developments in modeling and predictive tools in the areas of biopharmaceutics, manufacturability, product performance and characterization to enable improved product quality and process robustness of dry powder products will be discussed.

An Evening Reception: Connecting with the Patient: Developing, Applying and Regulating Smart Inhaler Technology

Opinion leaders and stakeholders will participate in a facilitated debate on key issues in the development, application and regulation of smart inhaler technology.

Session 2: The Evolving Global Regulatory Landscape

Regulators from across the globe will share current hot topics on the regulation of orally inhaled dosage forms with a focus on digital health and connected inhalers.
